SUMMARY

Diligent, detail-oriented web developer with a background in Education and life-long dedication to learning. Proficient in front-end development. Exposure to the MERN stack. Effective at combining creativity and problem solving to develop user-friendly applications. Results focused. Passionate about learning new programming languages and technologies to help further my career.

TECHNICAL SKILLS

HTML5 | CSS3 | Bootstrap | JavaScript | jQuery | MySQL | MERN Stack (MongoDB, Express, React, Node) | Git | Heroku | Firebase

RECENT PROJECTS

Yum(Me) v.3 | github.com/lerodcalanoc/Yum-me-v.3 | thawing-thicket-66873.herokuapp.com/

Front-end Developer

"Make it your own!" A centralized application that provides users the hassle-free ability to research, develop, track and share their favorite recipes whilst having access to personalized, educational cooking insights via videos, articles, and tips and tricks.

- Utilizes MERN Stack, Passport, YouTube API, React-Bootstrap, Semantic-UI-React, SCSS, and Heroku.

In Or Out | github.com/lerodcalanoc/In-Or-Out | inorout.netlify.com/

Front-end Developer

"A nutrition app for deciding how to eat!" This application uses multiple API interactions to query a recipe based on a given ingredient, display nutritional values for that recipe - based on its ingredients, query a similar food product - available for purchase at a nearby restaurant and display nutritional values for that product for comparison.

- Utilizes JavaScript, jQuery, CSS, Bootstrap, Firebase, and Netlify.

Snappy Game | github.com/lerodcalanoc/Snappy-Game | snappygame.netlify.com/

Sole Developer

This is a memory game created with React. Score increases until a photo is clicked on more than once.

- Utilizes React, Node and Netlify.
-

EXPERIENCE

Ambassador and Sortation Associate – Amazon Logistics – Chatsworth, CA

2017 – Current
